Cellflo[®]

Lost Circulation Material

Cellflo is a ground cellulosic product made from select kiln-dried hardwood used for all types of freshwater drilling. This product can be used to reduce lost circulation and effectively improve the performance of coarser lost circulation materials.

Advantages

- Mixes quickly and easily
- Does not separate in water-based fluids
- Rapidly seals porous formations
- Very effective with coarser LCM materials

Technical Specifications

Product	Bulk Density (lbs./ft ³)	Moisture (As Shipped)	pH	Retained on U.S. Sieve No. 50	Ash Content
Cellflo	Typically 16 - 18	9% maximum	4.2 typical	10% maximum	0.5% typical

Packaging: 50 lbs. multiwall, water-resistant bags.
